PROFESSIONAL SUMMARY

Senior Android Engineer with 11+ years of experience designing, building, and shipping native Android applications used by millions of users worldwide. Expert in Kotlin, Jetpack Compose, and modern app architecture (MVVM/MVI, Clean Architecture, multi-module). Proven record of measurable impact: cut release time by 40% through CI/CD automation, reduced crashes by 25% via profiling and static analysis, and delivered SDK and platform solutions for T-Mobile and Unity. Security-focused engineer (CompTIA Security+, CEH in progress) and AWS Certified Cloud Practitioner, with hands-on experience integrating AI/LLM-powered features into mobile products.

TECHNICAL SKILLS

Languages: Kotlin, Java, Python, Bash, SQL

Android & UI: Jetpack Compose, Material 3, Compose Multiplatform, Kotlin Multiplatform (KMP), XML Views, Navigation Component, CameraX, Media3 / ExoPlayer, App Widgets, Deep Links, Notifications & FCM, In-App Updates / Billing

Architecture: MVVM, MVI, MVP, Clean Architecture, Multi-Module Design, SOLID, Repository Pattern, Dependency Injection (Hilt, Dagger 2, Koin)

Concurrency & Data: Kotlin Coroutines, Flow / StateFlow, RxJava, Room, DataStore, SQLite, Retrofit, OkHttp, Ktor, REST, GraphQL, gRPC, WorkManager, Paging 3, Offline-First Design

Testing & Quality: JUnit 5, MockK, Espresso, Compose UI Testing, Turbine, Robolectric, detekt, ktlint, Android Lint, LeakCanary, Android Profiler, Baseline Profiles, R8 / ProGuard, Macrobenchmark, Crashlytics, ANR / Memory Analysis

Build & Release: Gradle (Kotlin DSL), Version Catalogs, GitHub Actions, Jenkins, GitLab CI, Fastlane, Google Play Console, AAB / Signed Releases, Firebase App Distribution, JFrog Artifactory, GitHub Packages, Play Feature Delivery

Mobile Security: OWASP MASVS / Top 10, Android Keystore, Encryption at Rest & in Transit, SSL / Certificate Pinning, OAuth 2.0, JWT, Biometric Authentication, Secure Storage, Code Obfuscation, Static / Dynamic Analysis (SonarQube, Snyk, OWASP ZAP, Burp Suite)

AI / ML on Mobile: LLM API Integration (Claude, GPT, Gemini), Prompt Engineering, RAG, ML Kit, TensorFlow Lite, MediaPipe, AI Chatbots & Assistants

Cloud & Tools: AWS (EC2, S3, Lambda, IAM), Firebase Suite, Docker, Kubernetes, Git, Jira, Agile / Scrum

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Avrioc Technologies

Dubai, United Arab Emirates | Sep 2025 – Present

- Lead native Android development on high-scale consumer products, owning architecture decisions, feature delivery, and code quality across the mobile codebase.
- Drive adoption of Jetpack Compose, Kotlin Coroutines/Flow, and multi-module Clean Architecture to improve build times, testability, and developer velocity.
- Mentor engineers through design reviews and pairing, raising team standards for performance, security, and maintainability.

Android Engineer — Unity

Dubai, United Arab Emirates | Oct 2022 – Jul 2025

- Engineered high-performance, security-hardened system-level Android applications in Kotlin across diverse hardware platforms, supporting millions of users globally.
- Cut app release time by 40% by designing automated CI/CD pipelines with GitHub Actions, eliminating manual release steps and enabling repeatable, traceable deployments.
- Reduced runtime crashes by 25% through systematic performance profiling (Android Profiler, memory/ANR analysis) and static code analysis.
- Accelerated issue resolution by 30% by integrating real-time analytics and structured crash/feedback reporting into engineering workflows.
- Streamlined versioning and artifact management with Gradle and GitHub Packages, delivering reliable, fully traceable releases across multiple applications.
- Raised code quality through rigorous peer reviews and enforced linting (lint, ktlint, detekt), measurably improving maintainability and reducing review cycles.

Android Engineer (Contract, Remote) — T-Mobile

United States | Jul 2021 – Jul 2022

- Architected a modular, high-performance Android analytics SDK (Kotlin) unifying data collection from Google Analytics, Facebook, Adobe Analytics, and proprietary services across T-Mobile apps.
- Engineered a fully remote-configurable design enabling analytics providers to be switched dynamically without code changes or releases in host applications.
- Built end-to-end Jenkins CI/CD with automated unit tests, lint/ktlint static analysis, AAR generation, and Slack build notifications for real-time engineering feedback.
- Automated artifact versioning and distribution via JFrog Artifactory, making every SDK release traceable, reproducible, and instantly available to QA and external integrators.
- Drove SDK adoption through clean public APIs, performance optimization, and comprehensive integration documentation, reducing integration time from days to hours.

Senior Software Engineer — Absolut

Islamabad, Pakistan | Jun 2018 – Jul 2021

- Led native Android development of complete ride-hailing platforms (Christiania Taxi, Umi Rides), owning rider, driver, and in-vehicle tablet applications end-to-end.
- Built real-time location features at the product core: GPS navigation with live traffic, driver tracking (Google Maps API), geolocation pickup, and two-way rider-driver communication.
- Engineered always-on driver tablet apps handling background location, connectivity drops, and battery/memory constraints in production vehicles.
- Implemented secure onboarding (SMS OTP), scheduled bookings, ratings/feedback, and in-vehicle safety features; owned signed releases and Google Play publishing for multiple live apps.
- Acted as senior engineer for direct international client collaboration (EU), translating business requirements into technical specifications and mentoring junior developers.

Software Engineer / Senior Software Engineer — TEO International

Islamabad, Pakistan | Sep 2016 – Jun 2018

- Delivered native Android apps including NABUFIT (global fitness platform featuring international sports stars) with Google Fit integration, social feeds, groups, and advanced search.
- Built QuScan, a QR-based customer feedback and live-chat platform reducing business response times from hours to seconds.
- Championed Scrum practices and cross-functional collaboration; recognized for advanced debugging, performance optimization, and app maintenance across the product portfolio.

Associate Software Engineer — Seerat Soft

Islamabad, Pakistan | Feb 2015 – Aug 2016

- Developed and maintained native Android applications for international clients: new feature development, debugging, redesigns, and performance improvements.
- Contributed across the stack where needed, including desktop (Java, C#), web (PHP, JSP), and MySQL database applications.

CERTIFICATIONS

- **CompTIA Security+** — CompTIA | Issued Dec 2024 (valid through Dec 2027)
- **AWS Certified Cloud Practitioner** — Amazon Web Services | Issued Nov 2024 (valid through Nov 2027)
- **Certified Ethical Hacker (CEH)** — EC-Council | In progress (expected 2026)
- **Professional courses:** Python for Automation; Mastering Jenkins CI/CD; CI/CD with GitLab; Ansible Configuration Management; Flutter Essential Training; Agile Foundations (LinkedIn Learning)

EDUCATION

Bachelor of Science in Computer Science — Pakistan | Graduated 2016
